HOW TO START A BUSINESS IN FINLAND ON A BUDGET

STEVEN JACKSON

Life in Finland for a foreigner can be a trail, but from my experience the light at the end of the tunnel is starting a business in Finland

I am not saying that running a business in Finland is easy because it is not. If you have enough language skills in English it is possible to build a global business from your home computer. The reality of living here is that the average salary in Finland is low and taxes are high, while paradoxically the lifestyle is very good.

In the beginning, many foreigners are happy with this situation, they have a great lifestyle even though they have little money. However, overtime many like myself start to ask ourselves:

"Is there something more to this life in Finland?"

Maybe, I would like more, earn more, experience more, travel more and be more.

HOW STARTING A BUSINESS IN FINLAND AS A FOREIGNER CAN CHANGE EVERYTHING?

STEVEN JACKSON

Why I decided to start doing business in Finland?

To start my story I needed to return to the time I arrived in Helsinki with my wife Anja. We arrived almost penniless, with our daughter under our arms. It was a time when I was passionate about whatever I started. I can remember starting my first real job in Finland as a youth worker. I have to say I did enjoy the experience, but even then I knew it was a transition to something else, something better.

However, business or a higher aspirations requires more than short term goals of getting a job, but it pays the bills and that is what is important. Since, then I have been a passionate advocate of running a home based business. I began to understand that it could be the solution to creating a global business online from anywhere in the world and in my case Finland.

More importantly, as a foreigner I understood that, it was not that easy to get business loans. To make it clear, it was possible, but in my mind I had already decided that I could reduce my outgoing as much as possible by not running a traditional business. The online model seemed so practical, because it gave me the flexibility to live and work in Finland or not.

**WHY I DECIDED
TO START DOING
BUSINESS IN
FINLAND?**

COMPARE STARTING A BUSINESS IN FINLAND IN REGARDS TO TRADITIONAL AND HOME BASED MODELS

Even before I go through the list of reasons why running a online business from home is a better choice over a traditional business. Let us look at the failure rates of starting a business. Believe it or not, it is 80 to 90% with most business owners losing a lot of money and most of it not their own. So, before you ever make a decision to become any type of entrepreneur or business owner, there is a a few things you should know.

- Running a business is really hard work
- It is really hard to be successful in any type of business
- Most businesses fail within 6 months
- To own a successful business will take time, money and a lot of work
- Success is a mindset as well as skill-set that you may not have at the start
- If you do succeed in your business or even make a profit it will take a few years

Now that I have shown you the reality of having a startup business in Finland, let's compare the traditional business to online home based business model.

By the way did I mention the hard work????
